

## Job Description

### Senior Geospatial Analyst

<b>Organization</b>	<b>Coalition for Disaster Resilient Infrastructure (CDRI)</b>
<b>Job posting date</b>	<b>29 May 2025</b>
<b>Location</b>	<b>New Delhi, India</b>
<b>Grade and No. of position</b>	<b>Senior Specialist (1)</b>
<b>Salary and Benefits</b>	<b>Competitive</b>
<b>Contract</b>	<b>Fixed Term Contract (3 years), extendable for up to another 3 years, Full-Time, National / International Hire.</b>
<b>Applications Closing date</b>	<b>Applications will be reviewed on a rolling basis, with priority given to early submissions during the shortlisting and selection process. The position will remain open until it is filled.</b>

#### About CDRI

The Coalition for Disaster Resilient Infrastructure (CDRI) is a partnership of national governments, UN agencies and programs, multilateral development banks and financing mechanisms, the private sector, and knowledge institutions that aims to promote the resilience of new and existing infrastructure systems to climate and disaster risks in support of sustainable development.

#### Mission

“To support countries to upgrade their systems to ensure disaster and climate resilience of existing and future infrastructure.”

#### Impact (that CDRI aims to achieve)

By 2050, over US\$10 trillion of new and existing infrastructure investments and services are resilient to natural hazards and climate change through enhanced capacity, informed policy, planning, and management, leading to improved quality of environment, livelihood, and life of over 3 billion people.

#### CDRI Mandate & Value Proposition

CDRI has been envisioned and established as a global network to advance the agenda, support coordinated action among stakeholders, and focus on bringing voices from vulnerable geographies and populations to international policy forums. Internationally agreed-upon goals in the SFDRR, the SDGs, and the Paris Climate Agreement provide the foundational framework that guides the Coalition’s vision and mission.

As a global partnership, the Coalition aims to ensure that the investments of its members and partners are aligned and well-coordinated in support of the shared ambition of disaster and climate resilience of new and existing infrastructure. The two unique yet interconnected roles that CDRI

shoulders in this direction are:

- A Strong Coalition Driving Collaborative DRI Action: In 2025, CDRI stands as a partnership of 46 national governments and seven international organizations. The Coalition enjoys robust political support, which propels its efforts to advance the interests of its members and partners.
- A Solution-Focused Centre of Excellence for DRI: As a Centre of Excellence for DRI, the Coalition strengthens the individual and collective capacities of its members and partners by aggregating and sharing knowledge, brokering need- based partnerships, and strengthening capacities through collaborative learning and action.

### **Strategic Work Plan 2023-2026**

CDRI's Strategic Work Plan 2023-26 describes the broad contours of its priority actions and planned initiatives in the next four years. The Strategic Work Plan sets out a clear direction for the Coalition to pursue a transformational agenda for DRI in response to a changing risk landscape and evolving on-ground realities of its members. In the next four years, the Coalition will continue to leverage the expertise of its Member Countries and partners to develop context-specific, innovative solutions for resilient infrastructure towards the achievement of national priorities and global commitments of its members.

With the strategic work plan for 2023 – 2026, CDRI has set out the following strategic outcomes.

**Strategic Outcome 1:** A strong Coalition that has the membership, resources, and global leadership to drive global, national, regional, and local DRI action.

**Strategic Outcome 2:** Global DRI research, Coalition-led peer engagement, and CDRI-curated and generated knowledge promote risk-informed policy and practice.

**Strategic Outcome 3:** Enhanced capacities of government, private enterprises, and communities to implement post-disaster recovery and DRI action at scale.

### **CDRI Headquarters (Secretariat)**

The CDRI headquarters is established in New Delhi, India, to act as the Secretariat of the Coalition. The Secretariat functions under the direction of the International Governing Council and the Executive Committee to implement the programmes of CDRI.

### **Position**

The position is open to candidates of all nationalities.

All nationals demonstrating 10 years of international work experience in at least 5 countries across 2 UN geographic regions (from Africa, Asia, Europe, Latin America and the Caribbean, North America, and Oceania) would be considered for international positions (international hire).

### **Objective of the position:**

CDRI is establishing a Data and Technology team to enable its member countries to use earth observation, geospatial, and infrastructure risk data and models combined with relevant technologies for informed decision-making that strengthens the resilience of their existing and future infrastructure.

CDRI is looking for a Senior Geospatial Analyst to join this team and take responsibility for the various

geospatial activities of the team.

### **Key Roles and Responsibilities:**

- Lead the management, integration, and analysis of earth observation, geospatial, and risk data that underpin CDRI's products and services.
- QA, QC, and updates of geospatial and risk data supplied by third parties and from deliverables such as new versions of GRI and other tools developed for CDRI, recommending any necessary changes.
- Perform the GIS analysis required to produce reports, maps, and data for product users and to support CDRI projects.
- Collaborate with risk modelers and analysts to incorporate geospatial data and functionality into risk models.
- Conduct geospatial training within CDRI and for member countries.
- Provide geospatial technical assistance to users internally and from member countries.
- Incorporate geospatial features in new CDRI products and tools.
- Create web map applications, story maps, and reports displaying complex data analysis.
- Create and manage a directory of open and proprietary geospatial and infrastructure risk data sources and platforms through online research and create documentation, including metadata and other data quality measures.

### **Skills**

- Proven ability to work independently and collaboratively in multi-disciplinary and multi-cultural teams.
- Excellent communication and interpersonal skills.
- Analytical and strategic planning skills and the ability to handle multiple priorities.
- Ability to articulate and present data and maps using compelling visualization techniques.
- Familiarity with international frameworks such as the Sustainable Development Goals (SDGs), the Sendai Framework for Disaster Risk Reduction, and the Paris Agreement.

### **Qualifications:**

Master's in geoinformatics, data science/ planning/engineering/environmental science, or a related field with advanced coursework in statistics, big data, or IPCC climate models. Candidates with international education are desirable.

### **Experience:**

- 8- 10 years of relevant work experience.
- Working knowledge of procuring, cleaning, and analyzing open source and proprietary earth observation products, geospatial image raster, and shape files.
- Experience with geospatial operations is mandatory.
- Experience with various geospatial data formats (GeoJSON, raster, shapefiles) and metadata standards is mandatory.
- Knowledge of programming and coding in SQL/ Python / R / Google Earth.
- Proficiency in GIS industry-standard software (ArcGIS, QGIS, Manifold, Google Earth, ILWIS, ENVI, ERDAS IMAGINE), and geospatial libraries like GDAL, GeoPandas, Rasterio.

- Familiarity with global hazard event catalogs and statistical data covering socio-economic indicators, environmental indicators, and infrastructure asset inventory will be an added advantage.
- Experience working with natural hazard modeling, climate variability analysis, vulnerability, and risk assessment is an asset.
- Experience in contributing to the development of new-age interactive data experiences is an asset.
- Experience working in an international organization and with a diverse number of partners comprising Governments, the UN, multi-lateral systems, industry, financial institutions, and knowledge and research institutions in multi-country locations.

**Reporting Line:**

- The incumbent will report to the concerned director or the appropriate role per the approved organizational structure.

**Language Requirements:**

- Fluency in English, both oral and written.
- Knowledge of any of the UN's official languages will be an asset.

**How to Apply:**

If you have experience working in a similar capacity and want to make an active and lasting contribution to a global initiative spearheaded by India, please apply through the online application form only: <https://app.cdri.world/career/public/>.

CDRI is committed to achieving workforce diversity in terms of gender, nationality, and culture. Individuals with disabilities are equally encouraged to apply. All applications will be treated with strict confidence.

CDRI has ZERO Tolerance for sexual exploitation and abuse, any kind of harassment, including sexual harassment and gender / racial discrimination. Any selection, therefore, will be subject to satisfactory reference and background checks.
