CORRIGENDUM

Request for Proposal (RFP): Hiring an Individual Consultant on New Technologies for Resilient Infrastructure to support the development of the Second Biennial Report on Global Infrastructure Resilience

Reference No: RFP/CDRI/51/2024

Date of Issued: 06 December 2024

This corrigendum provides updates to the previously issued RFP. The following amendments should be considered part of the RFP process:

- Eligibility Expansion:** In addition to Individual Consultants, organizations with relevant experience in technology, engineering, disaster management, disaster resilience, environment, resilient infrastructure, or related fields are now eligible to apply for this RFP. Henceforth, the term “Individual Consultants” in the RFP should be interpreted as “Individual Consultants/Organizations.”
- Qualification Criteria for Organizations:** If an organization submits a proposal, the qualification criteria specified in **Sl. No. 16 (Page 11)** of the RFP will apply to the designated Lead Author or Project Manager for the project. These criteria remain unchanged for Individual Consultants applying independently.
- Terminology Update:** Wherever the term “consultant” is used in the RFP, it should be understood as “consultant/organization.”
- Proposal Submission Deadline Extension:** The new deadline for submitting proposals is **24 January 2025, 23:59 (IST)**.

Note: Applicants are advised to review this corrigendum thoroughly before submitting their proposals. No claims regarding insufficient clarity or lack of information will be entertained.
